VOL. 8 NO. 8

Friday, January 21, 1983

Tech Junior Brian Ritter returned to his West Hall room after semester break to find "Tarna" door smashed.

Campus authorities are investigating the unlawful entry and following vandalism of West Hall and the Student Union Building, which occurred during the Christmas break. The incident probably took place December 30, and was reported the following day by janitors.

According to Director of Campus Police Tom Zimmerman, the vandals most likely gained entrance through exterior doors of the SUB with a key since there was no evidence of forced entry. Furthermore, the security gate to the SUB game room was discovered open, again suggesting the use of a the coin boxes to the video games were broken into, however; all money had been previously removed.

The vandals then passed through connecting doors to the cafeteria and then on to West Hall through the cafeteria's south doors. Once in West Hall the intruders kicked in one door in the lower east wing. They forced the locks of a number of other doors in that wing and the upper east wing using a screwdriver. An exact count of the number of rooms entered had not yet been determined, but Director of Residential Life Rhonda St. George estimated the number to be between five and ten. Zimmerman confirmed that there were obvious signs of forced entry into five rooms.

At press time only a very few items had been reported missing from West Hall. The vandals passed up expensive stereo systems, and televi-sions. "It appears they were looking for something specific," commented Zimmerman. He went on to say that drawers and closets had been riffled.

One room entered was that of a Resident Assisitant. Upon return to Tech, he reported master keys to West Hall and South Hall were missing from his desk. Late last week Tom Zimmerman confirmed that report. When asked about de-tails of the matter, Rhonda St. George replied, "I have no comment on that."

Gormley: "It's discriminatory as hell"

Registration Required Draft **Federal Financial** For Aid

All males between the ages of 18 and 23 must show proof of registration for the draft to receive monies from federally subsidized financial aid programs after July of

This was announced recently by Tech Financial Aid Director Simon Gormley. The new federal law was pushed through Congress by Republican Senator Samuel Hayakawa from

California.

"It's discriminatory as hell," said Gormley. "It discriminates against the less affluent, and males, specificarruent, and males, specific-ally those males between 18 and 23 years old, he con-tinued. But he went on to point out that it is a federal law and as such it must be

Those males involved will be required to show written proof of registration. This will be in the form of a let-

ter sent out to all registered males from the Selective Service upon receipt of a regis-tration card. In case the letter has been lost, Selec-tive Service promises a duplicate letter can be obtained upon request in four to six weeks. "That's something I don't believe they're going to be able to do," Gormley commented.

Another financial devanother financial development pointed out by Gormley is the requirement of a signed copy of the student's 1982 federal income tax return for 1983-84 Pell Grant requests. In the case of dependent students, a signed copy of the parents' tax return will be required.

n will be required. This nationwide requirement came after it was found that about 27 percent of the student files examined in a

E. J. Workman Dead At 83

Dr. E. J. Workman, president of New Mexico Tech from 1946 to 1964, died December 27, in Santa Barbara, Califor-nia. Workman was 83.

Born in Loudonville, Ohio, Workman received his Ph.D. in physics from the Uni-versity of Virginia in 1930. From 1933 to 1946, he was a professor of physics and head of the Department of Physics at the University of New Mex-ico, which granted him an honorary doctor of science degree CONTINUED ON PAGE 3

In an effort to prevent a similar situation in the future, campus security and the housing office are planning to all master keys from remove the Resident Assistants. Only campus security officers will

have master keys to the dorms.
Then, should a student
get locked out of his room,
security will have to be notified at -5555. The dispatcher will then call the particular R.A. to confirm the situation. Following confirm-ation, a security officer will be dispatched to the dorm to unlock the door.

It may seem like a com-plicated system, but Rhonda St. George sees two benefits from the new policy. "Responsibility for carrying keys will now be placed on the individual student and not the R.A.," she said. "Furthershe said. R.A.," more, it should improve secur-ity," St. George continued. Tom Zimmerman also dis-

closed information concerning

the theft of an expensive stereo from a South Hall room, during the break. He would not reveal specifics, but he is not ruling out the possibility that the theft might be related to the vandalism in West Hall.

In general, he said that security on campus is difficult because of the lack of an effective key control program. Zimmerman noted that "over 90 percent of the security problems on campus during the last few years were initiated with a key." During semester breaks, dorm security is dif-During semester ficult because of uncontrolled access by students. Zimmerman said it was

standard procedure after students leave for an extended break, to make a door-to-door check of dorms to verify that all doors were locked. Also, a visual inspection is made to locate any open windows. In the future, Zimmerman hopes to improve security during breaks by chaining every door in the Student Union Building.
He concluded by saying,

We tried extra-hard break to control security."

Campus Services Announcement

Director of Residential Life Rhonda Savedge St. George announced that all Resident Assistants were now certified in Red Cross first aid and cardiopulmonary resuscitation.

She also noted that meal plans would be changed to a daily meal basis and that these changes would be automatic. Any student . not wanting the change, or those with questions, should contact Campus Services.

All students have until the end of January to change, add, or drop student insur-ance. After January 31, no changes will be made. Savedge St. George suggested all stud-

ents review previously mailed material concerning student

Finally, the Director of Resdential Life reported that six rooms in U-Hall were flooded during the break. "The pipes just died," she said. Repairs have been completed.

\$200,000 Goes To Macey Center

Recently, Kresge Foundation sent a \$200,000 check for Tech's Macey Center, helping the new theater/conference center to become a self-sustaining facility for the campus and community.

Kresge offered a challenge grant to New Mexico Tech for the center with the stipulation that sufficient funds be raised or pledged by December 15, 1982, to cover all construction expenses and provide an endowment fund.

Tech met that challenge and received the grant.

The total project cost for the center, which was dedicated last March, was \$3.9 million. The figure includes an \$800,000 endowment for continued operation. More than one-third of the total cost was raised in private donations.

State contributions of \$2.55 million were supplemented by \$710,000 from individual and Tech staff donations, \$168,000 from corporate gifts, and \$484,000 from Kresge and other foundations. fund drive, chaired by Holm O. Bursum, Jr., brought in approximately \$120,000 in individual and Tech staff donations.

The \$800,000 endowment is to be invested, according to New Mexico Tech Director of Development William Bradley. Interest earned will be used to help defray Macey Center's annual operating costs which are currently \$90,000. Income for the center, in addition to interest from the endowment,

is generated by meetings, conferences, and other events scheduled at the facility.

"The total endowment won be realized for another three years or so," Bradley ex-plained. "Roughly \$300,000 have been donated as multiyear pledges.
"We anticipate a modest

deficit of between \$10,000 and \$15,000 this year. Considering this is our first year of operation, and we will realize only half a year of interest on our endowment, I feel this is remarkable. anticipate we may break even in 1983-84."
"In its first full year

of operation, Macey Center is being used about one day in every three," said Dr. Charles Holmes, acting president of New Mexico Tech. "May and June of next year are completely booked. I feel the Center is definitely a valuable ad-dition to the Tech campus and a financial asset to the com-

"We are exploring various types of programs to see what is of interest to the Tech community," Bradley commented. "The Center sponsored an Audubon dinner and film which was a genuine success, and a Sunday evening film series is planned for the spring semes-ter. We hope Macey Center will get to the point where it can take some risk and book outside groups. However, outside groups. However, right now it is not possible to bring in performers without outside backing.".....

random search, contained discrepancies between income figures listed on tax returns and those listed on the same student's Pell Grant request.

The signed copy may be either the new EZ-1040 form, a standard 1040 or a 1040-A form. The tax return form should be submitted to the financial aid office, not mailed with the Pell Grant request package.

In general, scholarship dollars will most likely be more difficult to obtain in the 1983-84 academic year, Gormley noted. This is a result of reduced student support at both the federal and state levels. The federal government is eyeing domestic programs, including some student aid programs, for the cutting block. Closer to home, New Mexico's government is asking for a five percent budget reduction from state supported schools. Governor Anaya's administration will save about 6.5 million dollars with those budget cuts.

The outlook for students on financial aid is not rosy; it is, in fact, grim. The burden of reduced financial support for students will be compounded by a five to ten percent tuition increase scheduled for the 1983-84 academic year. The constantly widening gap between student financial aid and education costs cannot be expected to narrow in the near future.

narrow in the near future.

Is there any consideration being given to the plight of college students from the government that seems bent on making a college education even more difficult to achieve? "Sure there is," replied Gormley, "All you have to do is find the right Senator."

Financial Aid Office Offers Campus Employment

The following is a partial list of campus employment available through the New Mexico Tech Financial Aid Office. Contact that office for complete information, or to answer questions.

CWS-Three students needed at the Socorro General Hospital. See Pat Stidstone.

CWS-Student needed to work for Info. Services. Contact Bev Obline.

CWS-Two students needed to work in the Business Office. Contact Don Irby in Brown 4.

CWS-Student needed to work Mondays, Wednesdays, & Fridays in the Bookstore. Contact Kathy Bradley. -5169.

CWS-Grader needed for ES 303. Must have completed course with a B or better. Contact Philip Johnson. -1612.

CWS-Student needed 15-20 hrs. per week to do clerical work for the Bureau. Contact Judy in Workman 110. -5302.

CWS-Students needed at TERA. See Dorothy in Workman 269.

CWS-Students needed to work in the library.

CWS-Student needed to work at the Print Plant. Contact Rufie Montoya. -5621.

CWS-Paper grader needed for Chem 311, Analytical Chemistry. Must have completed course with a B or better. Contact W. Ohline in Jones 261. -5523.

CWS-Student needed to work in the Financial Aid Office. Contact Priscilla in Brown 106. -5333. CWS Preferred-Student needed to do clerical work for Special Services. Contact Janet in Brown 110.

CWS-User Consultants needed for Spring semester. 15-20 hrs/wk. Must have working knowledge of Fortran, Pascal, and the DEC. Stop by the computer center office for application.

CWS or UGH-Proofreader needed for geology and geophysics. Must have stron background in English. Contact Steve Blodgett in Workman 224B. -5112.

CWS, UGH, PT-Reader needed for ES 402. Contact Dr. Miller in Jones 112. -5619.

CWS, UGH, PT-Physical Plant is hiring students for part time janitorial work. \$3.85/hr. See Jim Shaffner at the Physical Plant. -5533.

CWS, UGH, PT-Upper division student to assist with chemistry and physics of air sampling. Contact W. Ohline in Jones 261. -5523.

CWS or PT-Clerical assistant needed to work 10 hrs./week in the Grad Office. Must be able to type, file, and operate computer terminal.

PT-Student with bookkeeping experience is needed to work for Carl Beckham, CPA. Contact him at 103 6th NE. -1091.
